

## SPARES "A" TYPES

- |                              |                                |
|------------------------------|--------------------------------|
| 1- Isolating pot for elect.. | 21- Contactor coil.            |
| 2- Water level indicator.    | 22- Isolating central tooled.  |
| 3- Level glass tube.         | 23- Delta cables.              |
| 4- Short-circuit contactor.  | 24- Transmission tube.         |
| 5- Income force cables.      | 25- Water inlet                |
| 6- Electrical cabinet.       | 26- Brass tube of thermost.    |
| 7- Motor.                    | 27- Outlet cock.               |
| 8- Reducer.                  | 28- Spring drive S3.           |
| 9- Pulley.                   | 29- Disc drive S3.             |
| 10- Side conductors.         | 30- Rod drive S3.              |
| 11- Central conductor.       | 31- Galvanized iron star.      |
| 12- Movable electrode.       | 32- Cooper bridge for phases.  |
| 13- Fixed electrode.         | 33- Contactor cooper terminal. |
| 14- Steel cable for pulley.  |                                |
| 15- Tank level conservation. |                                |
| 16- Limit switch.            |                                |
| 17- Thermostat.              |                                |
| 18- Central insulating tube. |                                |
| 19- Float.                   |                                |
| 20- Electric detector.       |                                |
